more than one self-contained pod including wireless communications electronics and an integrated antennae for said self-contained pod to operate as a **wireless access point** sustaining bi-directional communication with said at least one server,	In-Stadium Features: · Download and manage your Vikings tickets · Get directions to the stadium whether you're driving or taking mass transit · Explore the stadium and its many points of interest · Order food via the app for a safe, contactless experience · Gain Vikings Rewards points for using your Vikings app <https://play.google.com/store/apps/details?id=com.yinzcam.nfl.vikings> The Vikings are also building mobile technology into the structure of the stadium itself—in the form of 2,000 beacons. Beacons are small wireless transmitters that can sense a smartphone's location via Bluetooth low energy. The team also is placing beacons throughout the venue which will guide fans to their seats. Fans will be able to open up the app, type in their seat number, and receive turn-by-turn directions to guide them to their spot, Penhollow says. https://www.digitalcommerce360.com/2016/04/13/minnesota-vikings-kick-new-app-and-stadium-beacons/ The reference describes more than one self-contained pod including wireless communications electronics and an integrated antennae for said self-contained pod to operate as a wireless access point sustaining bi-directional communication with said at least one server.
